Projects

My Portfolio 🔗

A personal portfolio built with React and Vite to showcase my front-end skills and projects.

Key Features:
- Fully responsive layout.
- React.js for dynamic user experience.
- Dark Mode toggle with theme persistence using Context API.
- Showcase of projects and skills.
- Contact form powered by Web3 Forms.
- Text animations powered by framer-motion and typed.js.

E-Commerce Website 🔗

An interactive e-commerce site built with React, featuring a shopping cart, smooth navigation, and responsive design. It fetches product data from the Fake Store API and uses Redux Toolkit for state management.

Key Features:
- Shopping cart for adding/removing products.
- React Router DOM for navigation.
- Redux Toolkit for state management.
- Responsive design with React Bootstrap.
- Dynamic product data from Fake Store API.

Foodera 🔗

A React-based website for exploring food and recipes, built with a responsive design using Bootstrap and React Bootstrap components.

Key Features:
- Developed with React.
- Responsive design using Bootstrap and React Bootstrap.
- FontAwesome icons.
- Smooth scrolling with react-scroll.

Edusity 🔗

 A web app built with React and Vite, featuring smooth scrolling, Web3 form submissions, and custom styling using CSS and React Hooks for state management.

Key Features:

- Built with React and Vite for efficient development.
- Smooth scrolling with react-scroll.
- Web3 form submissions with Web3Form.
- Custom styling using CSS.
- State management with React Hooks.
